Access Commerce Named to Software Magazine's 26th Annual Software 500

Software Magazine Ranks Access Commerce as one of the World's Largest Software Companies

Chicago, Illinois and Toulouse, France, October 31, 2008 – Access Commerce (Euronext: 7424), a leading provider of multichannel commerce and configurator software, today announced its inclusion on the Software Magazine's Software 500 ranking of the world's largest software and service providers, now in its 26th year.

Access Commerce was ranked #369 with software revenue of \$16.3 million.

"The 2008 Software 500 results show that revenue growth in the software and services industry was healthy, with total Software 500 revenue of \$451.8 billion worldwide for 2007 representing 14.7% growth from the previous year," says John P Desmond, editor of Software Magazine and Softwaremag.com "We have added over 100 new companies to the list this year. We're seeing strong growth from more companies based outside the U.S., especially from systems integration and outsourcing services firms based in India."

"The Software 500 helps CIOs, senior IT managers and IT staff research create the short list of business partners," Desmond says. "It is a quick reference of vendor viability. And the online version to be posted soon at www.Softwaremag.com is searchable by category, making it what we call the online catalog to enterprise software."

The Software 500 is a revenue-based ranking of the world's largest software and services suppliers targeting medium to large enterprises, their IT professionals, software developers and business managers involved in software and services purchasing.

"Access Commerce is proud to be included for the second year in this list of top software vendors and solution providers", said Kurt Haller, Executive Vice President, Access Commerce. "Our improved ranking is attributable to our momentum in the marketplace and the positive feedback from customers experiencing tremendous results using our Cameleon software. "

Go to www.myswmag.com to subscribe to digital Software Magazine and be among the first to see the 2008 Software 500. It is being released first in the digital publication.

The ranking is based on total worldwide software and services revenue for 2007. This includes revenues from software licenses, maintenance and support, training and software-related services and consulting. Suppliers are not ranked on their total corporate revenue, since many have other lines of business, such as hardware. The financial information was gathered by a survey prepared by King Content Co. and posted at www.Softwaremag.com, as well as from public documents.

About Digital Software Magazine, the Software Decision Journal, and Softwaremag.com

Digital Software Magazine, the Software Decision Journal, has been a brand name in the high-tech industry for 30 years. Softwaremag.com, its Web counterpart, is the online catalog to enterprise software and the home of the Software 500 ranking of the world's largest software and services companies, now in its 26th year. Software Magazine and Softwaremag.com are owned and operated by King Content Co.
