**Access Commerce Recognized as 2006 Global 100 Software Vendor by
Manufacturing Business Technology Magazine**

Chicago, Illinois and Toulouse, France, July 26, 2006 - Access Commerce (Euronext: 7424), a leading provider of multichannel commerce solutions, today announced that it has been named to the *Manufacturing Business Technology Global 100* list of leading information technology vendors. The annual listing is based on a vendor survey conducted by MBT, and the rankings are based on total revenues in calendar year 2005.

The MBT Global 100 ranks business solution leaders in a number of key application categories including enterprise resource planning (ERP), supply chain management (SCM), customer relationship management (CRM), product lifecycle management (PLM) and plant management.

"We are delighted to again be included in this list of top software vendors and solutions providers for manufacturers," said Kurt Haller, Executive Vice President of Access Commerce. "Our growing success can be attributed to the ability of the Cameleon Commerce Suite to help companies improve revenues and profit margins, eliminate non valued-added activities from commerce processes and to help them become easier to do business with. With the introduction of two new products this year – Cameleon Spare Parts for managing part catalogs and selling spare parts, and Cameleon Product Information Manager (PIM) for content synchronization and syndication – we continue to expand the breadth of our solution to meet manufacturers' increasing needs to manage product, channel and process complexity."

MBT, in conjunction with research from Aberdeen Group, AMR Research, ARC Advisory Group, and Manufacturing Insights, an IDC company, ranks the leading business software vendors involved in the automation of plan, source, make and deliver business production processes. The 2006 list reflects the changing technology landscape, which includes the role of technology in lean processes and the continued effects of market consolidation. The MBT Global 100 is featured in the July 2006 issue of Manufacturing Business Technology magazine.

About MBT

Manufacturing Business Technology is a monthly publication that explains the use of information technology to improve productivity in manufacturing and supply chain. It is owned by Reed Business Information (RBI), the largest business-to-business publisher in the U.S. and a member of the Reed Elsevier Group plc (NYSE: RUK and ENL).

About Access Commerce

Access Commerce is a leading provider of Multichannel Commerce Solutions.

Access Commerce helps manufacturing, distribution, retail and service companies sell products and services through direct, indirect, call center and Internet sales channels. The Cameleon Commerce Suite drives business efficiency by aggregating, standardizing and syndicating product information across supply and demand chains. Cameleon simplifies key steps in the Lead-to-Order-to-After-Sales process by optimizing core business functions: e-commerce, electronic catalog and guided selling, product and service configuration, advanced pricing and promotions, quote and proposal generation, and order management. Employees, channel partners and customers use Cameleon to eliminate errors and non-value added activities, decrease cycle times and improve customer satisfaction, resulting in increased revenue and a reduction in sales and operational costs. Access Commerce customers include AREVA, Eaton Corporation, Eiffage Construction, Invacare, Leroy Merlin, Manitou, Mitsubishi Caterpillar Forklift Europe (MCFE), Perception, Perkins Engines, Saint-Gobain, Schneider Electric, ThyssenKrupp, Total and X-Rite.

Access Commerce is headquartered in Toulouse, France and Chicago, Illinois and has offices located in North America, France and Germany. Cameleon is a trademark of Access Commerce SA and may be registered in certain jurisdictions. All other product and company names mentioned are the property of their respective owners.
